KOMPERDELL. POLES MADE IN AUSTRIA SINCE 1922

KOMPERDELL HEADQUARTERS
Mondsee, Austria

DIFFERENT, BUT WITH A PURPOSE.

We develop and design with a deep commitment for creating value for the consumer and a passion for excellence. For us, "good" is by far not good enough."

Thomas Roiser, CEO KOMPERDELL

WE ARE THE N°1

We are always searching for the best solution, simply because we want the best for our customers.

That's probably why poles and protection from Komperdell have already won numerous innovation and technology awards.

WE DO IT OUR WAY

We have no room for bells and whistles.

That's why our products often appear puristic compared to competitors. We give up unfunctional details and decorative ballast in order to let the purpose determine the design.

Not everyone likes it, but our success proves us right:

Komperdell is the first choice for more than 200 athletes and one of the most successful brands in history.

By the way - we create and produce 100 % of our products in the heart of Austria. With a lot of passion and heart and soul.

We are „one“ team.

We are more than proud that everyone contributes to our successful products with dedication."

Charly Lindinger, production manager

THAT'S WHAT SETS US APART

OUR VALUES

MADE IN AUSTRIA

We are rooted in the heart of Austria and that is what our customers should feel.

We have been manufacturing in Mondsee since the very beginning. This is where the first idea was born and from where we have grown. Here we have everything from design, development to bulk production to make sure we can maintain our high-quality standards..

ECO BUT LOGICAL

Acting ecologically conscious is not just a slogan, but a matter of principle for us. We do not need a green logo or stamp; we are operating our business with an honest awareness of our environment. Our production facilities produce less emissions than a standard household kitchen.

As the pole manufacturer with the best CO2 balance, we have already achieved our climate goals a long time ago.

PRIMARY SUSTAINABLE

The fact that our poles are known for a very long product life span is based on our dedication to quality and excellence.

Having a closer look on origin and sustainability means more to us than a firm commitment to a clean environment.

For us it is essential to have a clear commitment to our workers, staff members, suppliers and most importantly our customers.

HEART AND PASSION

In everything we do you will always find and feel a lot of heart and passion from each one of us.

We pay attention to detail and constantly challenge us to find better solutions. Our athletes and customers can feel that too – and that's exactly why we are always happy to receive honest feedback.

SERVICE WITH GUARANTEE

Surprising and exceeding our customers' expectations is our goal. That is why we offer our unique 3-year free repair service.

We unconditionally repair your pole no matter what happened. Fast, easy and free of charge.

WE KNOW HOW

For more than 100 years we have been known as an innovator and pioneer.

This deep commitment to innovation and excellence has made us an industry leader.

Today we claim to have the market leading product in each and every category. Because for us "good" is just not good enough.

CHAMPION'S CHOICE

More than 200 athletes trust and win on Komperdell poles. From iconic skiers of the past to the coolest athletes of the present our house has always had a deep commitment for racing

FREERIDE & TOURING

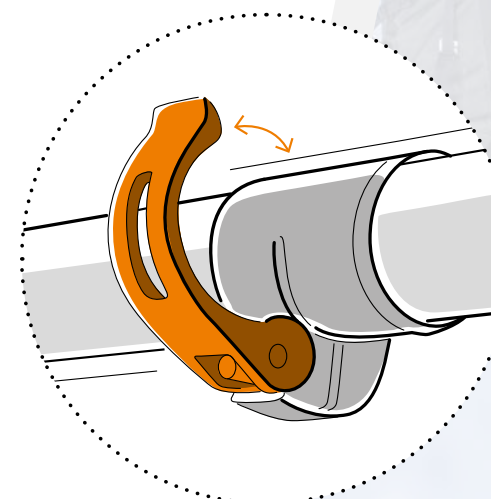

TOURING GRIPHEAD

Designed to adjust most touring bindings on the market. Often combined with an extended gripzone - a feature we invented 30 years ago - to make it possible to choke up on the pole on steep climbs and traverses.

ICE-FLEX BASKET

Large flotation baskets can prevent the tip to find a solid grip in steep terrain. Not so with our Ice-Flex system. It allows the basket to pivot up to 28° with the angle of the slope.

THE STRONGEST LOCKING MECHANISM ON THE MARKET

The Powerlock 3.0 is the only locking mechanism on the market which is completely made out of forged aluminum. It holds up to almost 200 kg - 300 % more than conventional molded locks - and is less affected by changing temperatures and cold conditions.

3 YEAR FREE REPAIR SERVICE

Komperdell stands for highest quality and truly unique service. We repair your poles, no matter what happened. And yes, even if you drive your car over it. Because for us, sustainability means a conscious, long-term approach to our environment - to nature and, above all, to our customers.

SNOWSHOE SERIES

THE LIGHTEST SNOWSHOE ON THE MARKET

Our carbon airframe is the world's first full carbon snowshoe. Changing the material for both the frame and the decking saves up to 50 % in weight without sacrificing strength.

MAXIMUM TRACTION

Stainless steel rail claws, are laminated directly into the frame and provide tons of traction on ice and hard packed snow.

KEEP YOUR FEET WARM AND DRY

The insulated neoprene toe covers keep your feet warm and dry in deep snow and cold conditions. It can be attached to any binding in our program.

NEW QUICKLOCK BINDING

The new Quicklock binding is a true game changer. It is super easy to get in, provides a solid connection to the snowshoe and works with almost any type of shoe. From lightweight running shoes to heavy duty cold weather boots.

Best binding on the market.

CARBON SNOWSHOES

100% Carbon! We offer the lightest snowshoe on the market. The result is truly amazing - 50 % less weight on your foot makes all the difference! You will feel it with every single step.

QUICKLOCK BINDING
super easy to adjust, fitting all sizes and types of boots and offering perfect hold

CARBON AIR FRAME 25

- Size Binding:**
- M, L
- Weight:**
- 691 g/piece
- Features:**
- integral built carbon decking
 - hollow-core carbon frame – especially light carbon frame, 50% less weight
 - ice-rail claws – incredible traction on ice and hard packed snow
 - New Quicklock binding – super easy to adjust, fitting all sizes and types of boots and offering perfect hold

PROTECTION

AWARD WINNING PROTECTOR TECHNOLOGY

Our technology is market leading. We are the only brand to develop our own protector. Both the foam and the protector are proprietary. We have the lowest residual force levels and the largest continuously protected area. Our protector technology has already won more than 50 international awards.

ONE-STOP INNOVATION

The protector as well as the garment are developed in our headquarters in Mondsee. We control every step from the first idea up to the final product. In addition to our own brand, we develop, design and manufacture protectors for some of the world's leading motorcycle and workwear brands.

25 YEARS KNOW-HOW

We have always been true innovators and market leaders. When we started with protection 25 years ago, we created the look and feel of the modern protector as we know it today. We were the pioneer brand offering an alternative to the hardshell protector of that era and have always led the market in both comfort and protective properties.

WINTERSPORTS

We are the only brand to not only develop and manufacture the garment but also the protector itself. This gives us the opportunity to perfectly match protector and garment. Over the years we have been able to constantly improve our protector systems, so that our new protectors are once again 25% lighter and more flexible.

A completely new protector

As the only protector brand we design, develop and manufacture our protector inserts by ourself. For the new generation of our Cross Flex protectors we have developed a new impact foam, 25% lighter but still with identical protective properties.

unlimited multiple impact capability

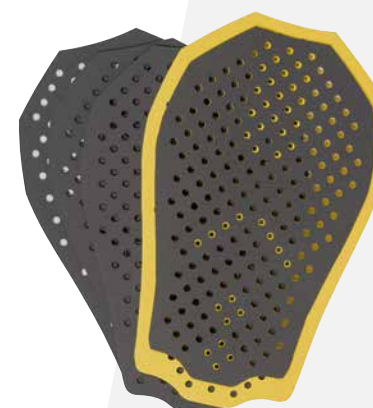

clever multilayer system
breathable and flexible,
fits perfectly on the back

Absorbs up to 93% of the impact energy
top residual force

washable
our products can be washed
without problems

CROSSFLEX ATHLETIC

A COMPLETELY NEW PROTECTOR SYSTEM

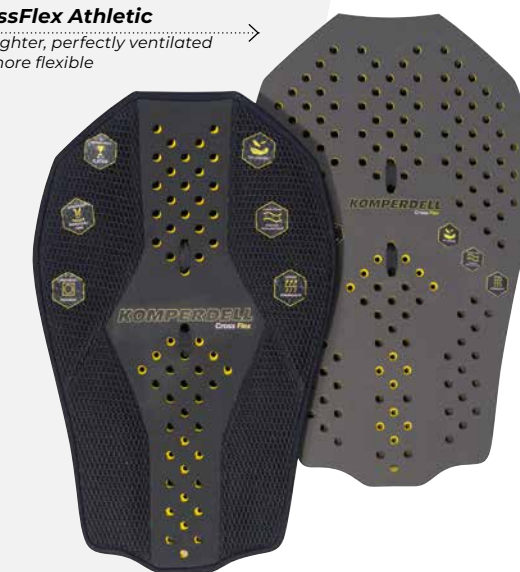

New protector foam
our new foam is up to
25% lighter with the same impact
protection

25% lighter, more flexible
and perfect breathable

CrossFlex Athletic
25% lighter, perfectly ventilated
and more flexible

Due to our signature multilayer construction and the seam-less integration the protector perfectly matches the garment. 3D Mesh on the protector provides additional ventilation.

2

Our new Ballistic System combines two brilliant products in one: The chest protector can be replaced by a normal strap system so that it turns into a Backpack – unique and only from Komperdell.

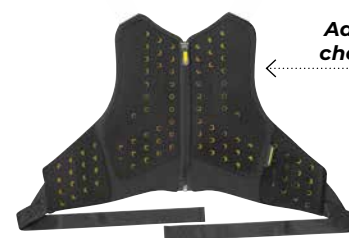

**1 System =
2 brilliant Products**

EQUESTRIAN

The most common injuries are caused by horse kicks or rotational falls, where the horse sometimes lands on the rider. With a Komperdell protector you do not need to separate from the horse for the protector to work and our unique construction and protective foam can absorb up to 93 % of the impact in case of a fall or crash.

3 TYPES OF PROTECTORS FOR MAXIMUM SAFETY IN EQUITATION

Automatic
width adjustment
without loss of protection

1 SAFETY VEST FRONTZIP EN 13158:2018 – LEVEL 3

Our safest equestrian protector with 360° protection and EN 13158:2018 - Level 3 certification. The ergonomic cut and the especially soft, flexible protector body ensure maximum comfort with best protection values. Perfect for cross-country riding and approved for eventing.

Automatic
width adjustment
without loss of protection

2 BALLISTIC FLEX FIT EN 1621-2 – LEVEL 2

In addition to the multi-layered back protector, the vest offers protection zones in the front and rib areas and is therefore the ideal protector for daily training. The automatic width adjustment ensures almost complete all-round protection with the best wearing comfort, as the vest automatically adapts to the rider's shape.

3 CASUAL PROTECTION EN 1621-2 – LEVEL 2

The casual line is the perfect alternative for daily training and work with the horse, as the protector is integrated directly into the garment, eliminating one layer of functional clothing. Absolute lightness and breathability guaranteed!

SAFETY VEST LEVEL 3 EN 13158:2018

360° perfect Safety with our Level 3 vest
Our safety vest providing 360° protection is amazingly comfortable. Due to its special ergonomic cut it perfectly contours to your individual body shape. The multi-layer construction and the especially soft foam guarantee a perfectly ergonomic fit.

BALLISTIC FLEX FIT

No Protector is as light and as comfortable to wear. The Ballistic vest is a truly iconic product and probably the protector that put us on the map on the equestrian market. It protects your back but has additional protection on the chest and ribcage - all this with a much smaller profile than conventional Safety vests, a superior fit and the best flexibility in our program.

TREKKING

INCREDIBLE LIGHTWEIGHT

While other brands buy carbon tubes of the shelf, we have been developing and manufacturing our carbon shafts by ourselves for more than 25 years. When we develop a new model it starts with the development of the shaft itself.

THE STRONGEST LOCKING MECHANISM

We are the only ones who produce a locking system entirely made of aluminum. This Powerlock 3.0 guarantees absolutely safety with a holding power of up to 200 kg and is not affected by any weather conditions at all.

UNIQUE FXP FOLDING SYSTEM

The first and only self-deploying mechanism on the market. A solid mechanical connection that guarantees safety on all activities. The self-deploying feature is a game-changer and makes the handling of the pole as fast and easy as possible.

FXP CARBON

"Unbelievable – as if by magic. My pole deploys completely by its own and is ready for immediate use thanks to the FXP technology. Simple, fast and light – completely without loss of stabilisation."

Verena Helminger, ambitious trail runner

Simple, robust and reliable. A rope is used for selfdeployment; push buttons remain completely load-free.

FXP CARBON

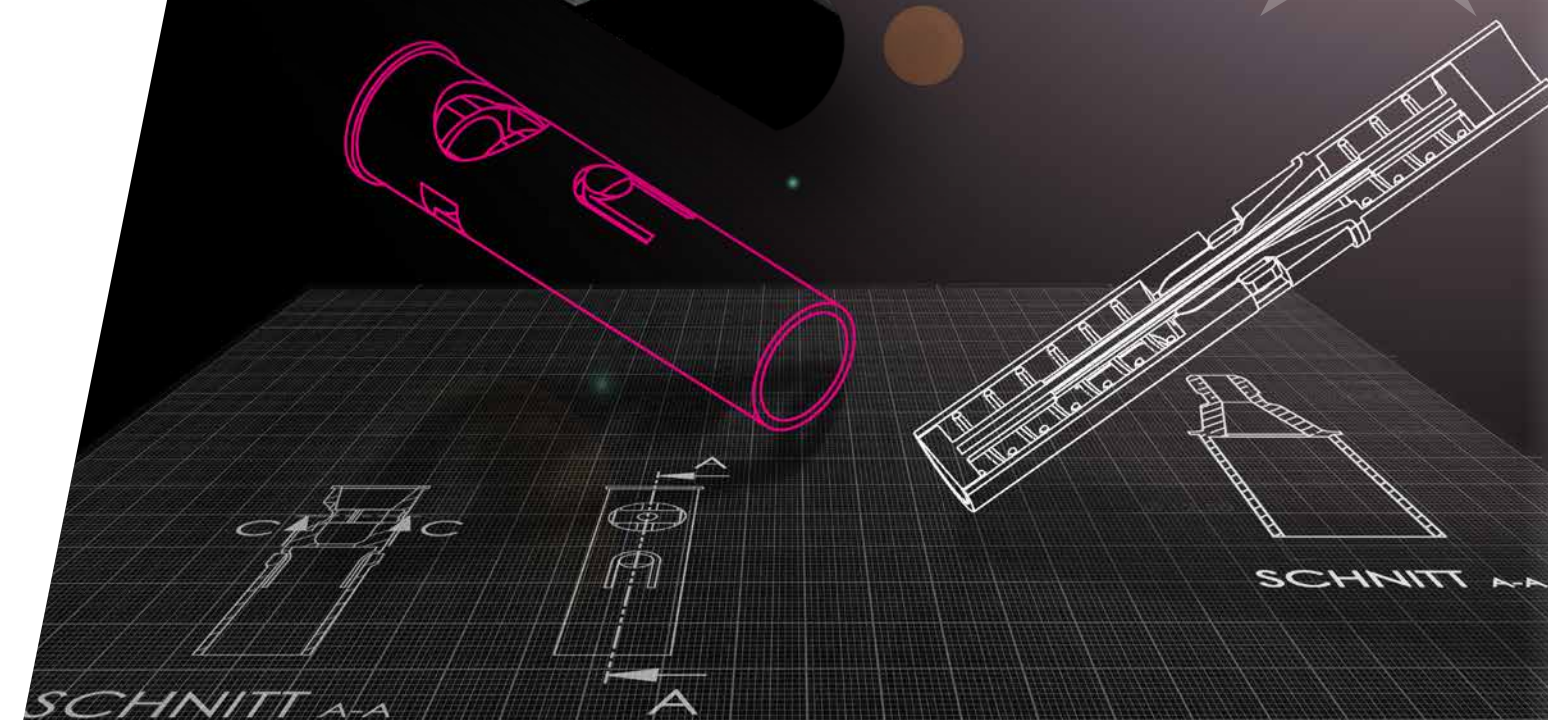

FAST HANDLING IN A MATTER OF SECONDS

+ ADVANTAGES AT A GLANCE

- + Unique self-deploying mechanism
